I fied unto the nearest town:
Here I resolved to sellle down,
'Mid dirt and grime, 'mid dust and mortar
Myself, my wife, my son and daughter.
The people crept about like analis,
Or lagging ships bereft of sails.
What is the matter here?'' Loried,
And many a trembling voice replied.

om out the faled town we sped; elimbed the mountains; overhead, iera the proud eagle builds her nest, pilched our tent to take our rest.

The doctors, now, who lack the skill
To diagnose each pain and ill,
To this one thing they all agree,
No mailer what their school may be:
With "Hom!" and "Haw!" and look prolound,
Your tongue they scan, your laugs they wound.
And then excising "My friends, tutl tut!
Your case, I find, is nothing but
Malarla!"

I've charlered now a big balloou;
I hope to occupy it soon.
If "It" comes there to ache my bores.
And waste my flesh, when 'neath the stones,
I hope my better part may soar.
To some fair land, some goblen shore,
Where I may never hear the cry,
That haunts me like a ghostly sigh—
"Malarlat"
—Mrs. M. A. Kidder, in Buldwin's Monthly.

## ONLY ONE FAULT.

You may see it in Greenwood cemery. A splendid tombstone with woman's name upon it. Not Ruth Holly -though that is the name under which you shall know her—but a prouder name, and one you may have heard. Flowers grow about her tomb, and the

had broken every vow-he neither chersound of marriage bells; but there are too many such stories in the world to be quietly passed over, haply there be any warning in them. The lives of others are, if we read them rightly, the best sermons ever preached, and this of Ruth Holly's is only too true. Yet it began very sweetly, like some old pasteral poem. She leved and was beleved again, and the man she loved had only one fault. He was young, he was brave, he was witty, ho was handsome, he was generous; his love was ilevotion, his below and burst into tears. friendship no hikewarm thing of words; ie had great talent and great power. His eloquence had thrilled many an andience worth the thrilling. What he smitten him into the thing he was, and 'em, and-" wrote touched the soul to the very quick. He was an amateur painter and musician and everywhere was loved and honored and admired. He had only one fault in the world—he drank too much wine at them. She thought of him reeling helplessly along the street, where the same and admired and stones at them. One turew a stone—a heavy stone, shurptimes. When he did so he turned, so and feared that some harm would come pointed and jagged. Whether he ever said convivial friends, into a very demigod. It was wrong, but not so bad as
might have been, and he would sow his and so freeze to death that bitter pight,

not think Ruth Holly's father. This down the street, busy this late Saturday and had broken that yow so utterly shadowed his virtue in his eyes, and poorer classes. he refused him his daughter's hand, giving him the reason why plainly and

He'turned and stood unsteadily look-

"So ought we both," said Ruth.

'Yon?" he said. "You ought

the two were enemies. Ruth suffered bitterly. She loved her father, and she loved Edward. To disobey her parent, or to break her lover's heart, seemed the only choice offered her. She had other lovers, she had seen much society, and had been introduced to the highest circles in France as well as in England, but amongst all the men she had known none pleased her as Edward Holly did. Not what one styles an intellectnal woman herself, she reverenced intellect, and her affections were in-

She met with her lover by stealth, against her father's will, but for a long while sho resented his entreaties to marry him in defiance of her father's refusal. At last, angered by her persistence in obedience, Edward accused to the babo at home and sistence in obedience, Edward accused to the babo at home and the streets outside, through which a drunken creature reels and staggers, howling ever and anon, "Ruth! Ruth!"

It is Edward Holly, who ever in his sistence in obedience, Edward accused her of fearing to share, the fortunes of one comparatively poor—one who must carve his own way up life's steep hill without assistance. The unmerited reproach sunk deeply into her warm heart, and in a sudden impulse of touderness and sympathy she gave him the promise to be sided to bring to his brain, demons and sympathy she gave him the promise town her cheeks. Again and again she pied with the mad man at her side. Again and again she pied wife. It is the pitiful, hourible, heart-breaking wreck of the once splen-his love and protection had been hers. In vain.

Wild fancies filled his brain, demons and sympathy she gave him the promise born of the fumes of rum held posses. and sympathy she gave him the promise born of the fumes of rum held posses

Securing His Safety by Hearty Laughter. On the fifth day of our march from endwe, I was, as usual, considerably in front of my men, who, with their loads, were not able to walk as fast as myself. The sky threatened a storm, which made me husten to reach Pamlio. On approaching the village nobody was to be seen, the natives being either out in the tields, or in their houses out of the rain. The stockade presented a rather minviling appearance, being ornamented with a few hundred imman skulls in all directions, from the freshly stuck-up head to the bleached craminm, and all apparently snapping their jaws at the ought of a new companion as the wind

However, the rain was falling fast, and

there was no use of being squeamish. So yet she loved him and clung to him, and in his sober moments he loved Some boy more brutal than the rest in order that I might appear with appropriate pomp. I had been thus ensconced priate pomp. I had been thus ensconced stillness of the village was broken by a loud, peenliar shont. This was almost immediately taken up from every quarter of the village, until every stone men screamed, and the men were seen to mrry toward the gates, shouting and brandishing their spears. I was very much astonished at this; but, supposing it was simply the fashionable mode of receiving a earavan, I remained still, expeeting my men every minute. However, the uprear continued without abatement, and my men did not appear. Thinking there must be something

wrong, I emerged from my cover.

To my surprise I found the gates closed, and the stockades and crows' Flowers grow about her tomb, and the turn't lies softly over it. You would scarcely guess her life and its sad end as you stood there. Rather would you fance the limit should here. Rather would you should here. Rather would you fance the limit should here. Rather would you should here. Rather would you fance the limit should here. Rather would you say stood there. Rather would you fance the limit should here. Rather would you fance the limit should here. Rather would you fance the limit should here. Poor Ruth stood where he had left her should here. Rather would you fance the limit should here. Rather would you fance the limit should here. Poor Ruth stood where he had left her should here. Rather would you fance the limit should here. Rather would you fance the limit should here. Poor Ruth stood where he had left her should here. Rather would you fance the limit should her should here. Rather would you fance the limit should here. Poor Ruth stood where he had left her should here. Rather would you fance the limit should here. Rather would you fance the limit should here. Poor Ruth stood where he had left her should here. Rather would you fall the stood where he had left her should her should here. Poor Ruth stood where he had left her should here. His worldly among them—dropped itself low upon mind, and striking an attitude like Hamber of the bosom of the drunken wretch who let's ghost, I moved forward with slow, tried to feel cold and hard toward him, "Come home, Edward! They'll hurt at me with staring eyes and open but she could not; she strove to remember the blow he had given her, the oallis he had uttered, but she answered herself as she did so, "It was not him who did it—it was rum." She listened to the nneertain, reeling footsteps in the street awakened some memory of the past in amazed savages recoiled still further, leaving the gate free. With a bound I reached it, and before they could recover their senses it was open, and I was out-side, to the unbounded joy of my men.

who were trembling for my safety.

An Incident of the Blockade. A correspondent of the Boston After iser, discussing the subject of color hudness, relates the following as coming inder his own experience when emilmington, North Carolina, during the war of the rebellion: "The ships on blockade duty got under way at sunset, nd at dark moved to their regular staions, some going well in toward Fort aswell and others further off, keeping nder low steam and in a specified beat.
To prevent as far as possible our own ips from mistaking and firing into each other, each supposing the other a block-de runner, as did happen more than once, my own ship getting three 24-pound shells from one of our own vessels, a system of challenging and answering sighals by showing or flashing a red or white light was established. As we all know the station or beat of each ship, we could snally tell with tolerable certainty what essel was sighted. But, to prevent aeidents, it was the rule for any ship ubting to challenge by showing the allenging signal for that particular night. If no answering light was shown, or an incorrect one, the challenger had a right to tire. One night my own ship was challenged. We were so near that all hands on my vessel knew well what ship made the challenge. We answered by showing a red light for three or four the gentleman bent forward and started back with a crv of anguish.

seconds. Again we were challenged and again we answered as before. All hands were at quarters. Almost immediately after our second answer the lock-string of the 100-pounder rille on board the challenger was pulled, the gun, pointed directly at my ship, happily missing fire. Before the gnn could be reprimed we were made out, and no harm done. The next day an interview was had with the commander of the challenging ship, and he was informed by me that his challenges were correctly answered, I my-self seeing it done. Why our answers down more stupefied by the liquor ho liad swallowed, in that fresh, cold air. that he had been many months in command of his ship, and never before had that gun missed fire."

Men may inquire solemnly and with many a doubt whether any other world than this awaits the human race; but, once admitting a second life, the dark and ir a sudden impulse of concerness and sympathy she gave him the promise he had so long songlit in van. They were married that evening, and before morning were upon their way to a faroff city, where Edward, sanguine and conscious of power, believed that he should-make for himself-a, fiame and position of which any woman might bepround. To her father Ruth wrote a long letter; imploring his forgiveness, but the answer grushed all hope within her bosom.

"As you now sow, so must you reap," were the words her father wrote. "I have no longer a daughter?" and Ruth knew that henceforth (for she had been motherless for years) she head in all the world, only the husband for whom she had sacrificed fortune, and what is worth far more, the tender protection of a father.

In those early days Edward did his best to make americal for all, and she was seen that so the father way to be the way a father.

In those early days Edward did his best to make americal for all, and she was as and she to make americal for all, and she was a supplied to the very heart was she than been to fail and she was a she was a she than the power of motion had almost head father.

In those early days Edward did his best to make americal for all, and she was a she than been to make americal for all, and she was a she than been to fail and she was a she than the power of motion had almost described and startly she can a father, and was still with the strange of the city died on the province of the city died on the province of the function of the city died on the little hard a hearing the world of him for the province of this remote lorizon. The recan be no that remote horizon. The remote lorizon. The second life without a memory of the winds are stronged to him the the world had father with the strange stillness says of the function of the father with the second life only in the remote lorizon. The second life without him they be seen the world had father with the strange stillness cloud of punishment must be seen on that remote horizon. There can be no tervene, with their learning and eloquence, and oppose the simple evidence of memory in this strange case. It is your first world. Your memory can pick up its twenty or thirty or forty its sixty years, and can hold them all in or grasp and say I once lived one of those summers and winters. We can all look at that bunch of faded flowers and say I saw them when they were fresh and beautiful. This recollection is, therefore, that mental attribute which alone will make possible a resurrection from the dead. The only immortality that can be thought of is, therefore, one which can look back upon this tirst experience of being. Unless friends shall know each other, there will be no meeting of friends, for take away the recognition and all else is empty. Thus the future world awaits wholly upon memory—the creator of immortality.—Prof. David Swing.

# Freaks of the Telegraph.

Named are always a great stambling block to in clerks, and addresses are ompose of names. Most of us have fashien; and although the Postannouncements will henceforth be printed exclusively in Roman characters.

The report of the second geological survey of Pennsylvania contains, in a description of the coal flora by Prof. Leo Lesquereux, one of the most remarkable geological accounts in existence of the forms and habitats of plants once growing in the swamps of our American coal fields, or floated out into open water and ombedded in the deposits at the button of the carboniferous sea.

The report of the second geological the painting gives the drawing and shading. Some of our native artists have recently tried to make improvements in this beautiful art, and now the most delicate and complicated pictures are made without the life paint. To understand this course out of glass and window made. New York may be given.

It is for a cliurch and sashes and the painting gives the drawing and shading. William Stuart's Okra Soup. A funny story comes from Eastern Connecticut, which is well vouched for. During the war William Stnart, the theatrical manager and writer, was to give a dinner party at his house, near the Pequot at New London, at which he desired to furnish okra soup. Finding none in the city, he telegraphed to New York to a firm there to advise him whether they could supply him. Next day, in the midst of a rush of war telegrams to the New London Star, came one addressed to Mr. Stuart, which read: "We have got Okra." By mistake the address was omitted in copying, and the telegram sent to the Star office with the war news. The intelligent editor ran over the news till his eyes fell on this mysterious telegram, which he totally misconceived, and at once got out a big bulletin: "Another great victory by the Union forces! We have got

and stowing away entire, others several times larger than themselves. This extraordinary fact is rendered possible in the first place by the great size of the mouth, which is cleft far backwards, and in the next by the excessive distensibility of the stomach and the abdominal integuments. The captor sizes the larger fish by the tail and climbs over it as it were by alternate movements of the lower and upper jaw, until finally the entire animal is stored in the stomach. Meanwhile, the stomach and the adjoining soft parts become more and more distended and hang down like an enormons sack. The most remarkable example of such capacity have been found in the Chiaswodon niger, a species re-lated to the cod family, but several others are likewise prone to attack."

DR. SANGFELDT has tried a number of substances for destroying microscopic life in drinking water, the most striking results being obtained from citric acid When one part of the acid was added to two thousand parts of water, life ceased in from one-half to two minutes. Microscopie examination showed that those forms of animaleula having a thick scaly covering are not affected by the dilute citrie acid, but only those with thinner coatings. The greater part of these unwelcome visitor belong, however, to the latter class, while the former are visible to the naked eye, so that a solution of the strength mentioned will suffice as a safeguard. The dead animaleula immediately settle to the bottom of the vessel containing the water, and may be found in the sediment. The

Nathan Guilford, once a well-known entizen of Cincinnati, was au active Whig politicinn, and editor of an energetic Whig paper. On April 1, of a certain year, he published a circumstantial account of experiments by a German chemist named Roorback. Roorback

Origin of the Word Roorback.

posing it might be possible at last to compound a hatchable egg. According to the story, after putting many of his manufactured eggs to the animal heat of different patient mothers, he at last happily succeeded in hatching one egg and produced a living bird. The story then goes on to describe very minutely the strange creature, anatomically, physiologically and every other way, imitating the scientific style used in similar cases. The story read very well, and was copied into many other papers, and, after going the rounds of the press in all parts of the United States, it was at last (after three or four months) discovered to have been first published on the 1st of April.

The Cincinnati Enquirer (Democratic) immediately fixed upon Mr. Guilford the name of Roorback, which was thereafter held to mean a political liar, although the story had nothing to do with politics. Being well stnek to, the name at last became pretty well fixed, and Mr. G. was for many years well known in the political field as Old Roorback.

Don't Do It. Don't gamble. It's a sin to bet on the wrong horse.

Don't boast of your little vices. They will advertise themselves. Don't worship wealth. It is better to hend tho knee to obtain it. Don't let your dog sit in front of a they rejoice."

ian alphabet and published in Latin a We stated recently that Prof. Loomis volume on his new method. At present has been experimenting with encourg-ing success on the feasibility of dispensing with wires in telegraphing by bringing into service an electric current which. shorter or more simple than that used in antiquity.—Galignani. he assumes, circulates constantly in the upper air, and making it the agency for transmitting messages from one point to another. It seems, now, that telegraphing is not the only business that aspires Modern observations have shown that to get rid of the cost and incumbrance of the stars are not really fixed, but have wires. Dr. Graham Bell, inventor of actual motions of their own through the Bell telephone, proposes to dispense space. This motion is so slow that it would require thousands of years to prowith them also, and use light instead, claiming that a strong ray of light between stations will do the work quite duce a change perceptible to the naked eyo. As a general rule, the brightest as well, and carry the sound from point stars have the greatest proper motion.
As far as has yet been observed, these motions take place in perfectly straight lines; so that if the stars are moving in to point with perfect accuracy. There is a thin mirror called a transmitter, which, when spoken against, by its disturbance, causes a variation in the beams of light which it reflects, and these rays, orbits they must be so great that, with one or two exceptions, no curvature has been detected. Most astronomers think collected in a parabolic reflector, have the strange power of reproducing the that, from mero observation, there is no words spoken against the mirror. Words reason to believe that the stars are rehave been accurately transmitted a disvolving in orbits around a common centance of 700 feet, and it is believed that ter. Dr. Madler, however, through an when the process shall have been perexamination of the proper motion of certain stars, came to the conclusion fected, this distance will be greatly prolonged, so as to make the photophone that there was a center around which as it is called, a serviceable, practical the stars revolved, and fixed upou Aleyinstrument. A curious fact in connecone, the brightest star of the Pleiades, as most probably that center. Others have suggested the constellation of Pertion with these experiments for making rays of light swift-winged messengers for bearing words from a speaker to a hearer seus. Mr. Hall, who has lately examso far apart as to be invisible, is that ined this subject, holds that neither of some substances interposed between the points intercept the ray, while others do not. The human hand effectually cuts these positions will satisfy the necessary conditions. After a consideration of conditions dependent upon proper mooff communication, but the ray by some tions alone, he claims to have found two points that give satisfactory results; one means manages to trasmit its power and in Andromeda, the other diametrically the words with it through opaque dead substances. If these experiments shall result in completo success, we shall have stances were used by him for deciding new wonders in the art of transmitting in which direction the center lies; one sound and signs. Light is cheap, and of which was that if it be in the the upper air electrie enrrent, direction of Hydra, there would have to existonee is assumed, will cost only the ho a great central mass around which means of reaching it; and if these two agents shall provo as available as the the stars revolved. As there is no visexperiments promise, three-fourths the expense of telegraphing and telephoning will be saved.—St. Louis Republican. ible center, and no clustering of stars around it, he inferred that the center is toward Andromeda, and finally fixed its position at one degree south of the sixth-magnitude Star 65, Piscium. There are three small nebulæ in the neighbor-

Tired with their busy day, Lying here on their pillow— Dear little Beth and Fayel

Close by are the flaxen-haired dells,
Tucked into their crib to sleep—
Tender watch do these little mothers
Over their children keep. And over there in the corner,
And there, where the table stands,
I see their playthings, wailing
The touch of their little hands.

I stand beside my darlings,
As they lie here calm and still,
And I wonder what shapes from dresmland
Their innocent slumbers fill.

Many things have the wise men told us
Of all that is and seems;
But not the wisest among them
Can tell us a baby's dreams.

were black, and some were gray. This one was white and her name was Polly. One day Mrs. Penny said to the girl and cover her with a basket." Polly was very young, and had never sat on any eggs before. She thought it would be good fun; but when the basket

was put over her she felt as if she could It was not nice to be shut up in the dark. And then she did got so tired! It takes only three weeks to hatch chickens, but it was four weeks before Polly's trouble. Widow Bedott gave some adducklings came out of the shell." And when they came out, how funny they looked! They were very large and

vellow, with round bills and very queer feet, and when they tried to walk they waddled. Polly had never seen any ducklings before, and I suppose she thought these creatures were chickens. They did not look like other chickens, to be sure, but she thought they were all the nicer for that.

Manuel Penny came out laughing, and

set a pan of corn meal dough near the back door. Polly was very hungry, but she would not touch one monthful until she had called her little ones to breakfast, There were twelve of them, and they dipped in their little round bills like After breakfast they rolled up they

eyes, and what do you suppose they were thinking about? They were thinking how much they wanted to swim. Was it not strange? How did they know unything about swimming? They had never seen any water; they had only seen the blue pump in the yard. But they made up their little minds that they would go and find some

Now there was a pond behind the barn, not very far off. Nobody told them it was there, but they ran that way as fast as they could waddle. Their mother ran after and tried to stop them, but the moment they saw the water those ducklings jumped right

into it. - Poor Polly! How frightened she was. How she flapped her wings and elucked!
She thought they were crazy, and she was sure they would drown.

Could hoe a row of taters in one time and a good harmonium, and pious books two motions and lay the last weed on the left side to wunst. That was a brother was sure they would drown.

Could hoe a row of taters in one time and a good harmonium, and pious books troubled with deafness somewhat of the left side to wunst. That was a brother with Dutch titles lie scattered about. And there are flowers on the table, and the flowers of the flowers on the table, and the flowers of the flowers on the table, and the flowers of the flo But no, they struck out their little feet and began to swim. It was a pretty

sight. They held up their heads and Polly did not know what to think of this, and when she found it did not hurt them at all she was very proud, and liked it as much as they did. After this they came to the pond every day and she came with them. She thought there never was such a bright family as hers.

They were brighter than their mother; and Polly was ashamed because she could not swim, Well, tho next summer came, and Polly sat on some hen's eggs, just as the other hens did, and of course she hatched chickens instead of ducklings. She took them down to the pond the very first thing. Wasn't it queer that

should remember about it? But they would not go into the water. She clucked and scolded and almost pushed them in, but it was of no use: hey couldn't swim and they wouldn't Polly was very angry. Such bad chickens! Why, they were worse than none, she thought, and she would not be their mother another minute.

You will laugh, but Polly turned and went home. The chickens followed but she drove them back. They peeped, and she pecked them with her bill. They were hungry, but she gave them no dinner or supper.

When night came she would not take them under her wing, but went to roost with some other hens on a pole in the barn. The poor little chickens felt very sorry, ont she never, never lorgave them for not learning to swim! And so they had to grow up without any mother. Don't you think this is a droll story? And wasn't Polly very bright for a hen, with a head not as big as a walunt?

A Study in Black and White. Mr. Morse was an artist. He painted pictures on canvas. Sometimes he drew them with a lead pencil on blocks of wood. Then the engraver cut them out, so that they can be printed in books.

One winter Mr. Morse was sick. The doctor told him he had better go to Florida. He went, and stayed there till gh the winter.

In March, which is cold and windy in the North, the air is sweet with the per-Oranges grow in Florida. They are the sweetest in the world. In March all the orange trees blossom. The leaves

on these trees are green all winter long.

Mr. Morse was very fond of tishing and hunting. One day he went five iles through the forests to a lake. From the live oak trees the trailing moss hung down like a lady's veil. As the winds blew through the pines it made a soft, sad music. When he came to the lake he found a

tree which had blown down into the water. It had been there for years. Its leaves and branches were all gone. It was nothing but a long, straight stick.

The artist walked out on it and tished all the forenoon. As he started to the shore he saw a snake asleep on the log. The snake's bite would kill a man. Mr. Morse feared the snake would bite him. He waited a long time, but the

He stayed on the log three long hours more. Then a negro boy came along in a boat. The boy's name was Paul, The artist told him about the snake. boy with one blow of his fish-pole

The next morning Mr. Morse went by the log cabin. He was going to shoot wild turkeys. In front of the cabin sat Paul in a chair reading his book. He was as happy as any one could be.

The artist took out his peneil and sketch-book. He made a picture of Paul reading his book. He put in the log-cabin, and the flowers Paul's mother had planted.

Mr. Morse called his pieture "A study of black and white."

The Brief and the Diffuse,

Brevity is not only the soul of wit, says the Galveston News, be, ordinarily, the mark of good commo sense. A Glimpse of Life in Paris. A Paris correspondent of the Boston Globe writes: Paris is, indeed, a beautiful city; its long miles of white houses, of uniform height and style of architecture; its wonderfully clean and suberbly paved streets, win for this metropolis the admiration of every visitor. The water in the gutters and drain war-velously clean, and the poorest is a paragon of politeness; rough in his ontward appearance, heavy sliges, cordurovs and blue blouse, he is an agreeable disappointment to one who asks some information in regard to a street or boulevard he may wish to find. To-day I visited the Jardin de Plants and found it resembling in many respects the Zoo ogical Gardens in Regent's Park, in London. All ranks, high and low, rich and poor, were strolling through the inclosure, feeding the animals, sitting on the benches beneath the trees or examining the museum. There are collections of botanical specimens from all parts of the world. Every animal has its den to which it can retire, its tree to climb or burrow to dig in. The feathered tribe have their pool of clear water to bathe in and their grass plot and graveled walk to traverse and exercise upon when they

will. There is a circular building within the grounds—a sort of amphitheatre set apart for lectures on zoology and ornith-ology. The French are a strange people. In a window on Rue St. Denis I saw offered for sale prayer-books, beads, and chromos ridiculing the clergy, all side by side in the same window, and also along several bonlevards. I observed the same strange inconsistency in the display of religious goods. During my halt at Calais I saw the monument erected to commemorate the embarkation of Louis XVIII. for London, which is near the quai of this ancient scaport. At spring. The weather there is like spring hear the quai of this ancient seaport. At Bonlogue Sur Mer I saw also a monnment erected to Napolean I. from the window of the train. It stands upon an emineuce overlooking the channel, and is of white marble, a doric column, and

occupies a very conspicious position.

With an average price per annum of \$7.33, and an aggregate daily circulation of 3,581,187, the people of the United States appear to pay out annually the sum of \$26,250,100.71 for their daily newspapers. These totals are subject to eertain obvious qualifications. Every newspaper has a free list, more or less large, the chief item of which is in its printed regularly, but not sold or circulated and including tear and waste. On the other hand, and especially in the large cities, a considerable per cent. of the total circulation is disposed of by the single copy at the retail price. While the average cost to the annual subscriber the average cost to the annual subscriber is 2½ cents per copy, the average retail price per copy for the country is nearly 4½ cents, the largest average for a State being Nevada, where it is twelve cents, and the lowest in Delaware; where it is 1½ cents per copy. It is probable that the added cost of the papers sold at retail is quite sufficient to offset the deductions which are to be reade in the

"Would you say" asked the pro-fessor, "'I would rather walk," or I had rather walk'?" "I would say," replied a smart bad boy, "I had rather ride." And he was marked three below zero, with cloudy or partly clearing

weather. Our in Cincinnati they propose to send a man to jail if he reads a nurspaper on Sunday. Considering the marneter of Cincinnati papers, this is right.—Boston

I have walked by the side of a policeman sing home at night, and seen him blow his whistle, and I never would hear it, although it could be heard by others half a mile away. I never heard the apper notes of a piano, violin, or other musical instrument, although I would hear all the lower notes." Mr. Cowles has con-

of the knee. He applied St. Jacobs Oil The Price of Newspapers.

Canadian newspaper publishers are becoming alive to what is due to themof a dollar a year in the price of both papers. The Hamilton and London dailies have followed snit. Even now they are cheaper than papers of a similar class published in the United States, where they charge \$12 a year. Our Canadian city papers should go further and raise the price of their weeklies to something above the bare cost of the paper on which they are printed. No large weekly worth reading can be published for ess than two dollars a year, and even at that price it would not pay the proprietor unless there be a large cash advertising patronage. These so-called "cheap" papers are dear in the long run, for they must economize in some way, and that can only be done by curtailing matters which would otherwise be more liberally treated, -Stratford Beacon.

ADVICE is cheap, -dreadfully cheat But we must be true to our instincts of humanity and tell our suffering friends to use St. Jacobs Oil, and surprise their rhenmatism and themselves also at the result. J. D. L. Harvey, Esq., of Chicago, says: I would be recreant to my daty to those alllicted, did I not raise my voice in its praise.

she scaled rocky passes, she waded through morasses, and finally arrived, just alive, to find her husband better. But the exposure and exertion killed her; she was seized with pneumonia and rugged miner-he broke a blood vessel, and both are buried in one grave.

request of his wife not to be disagreeable, "let us make np. I said there was no woman in the world as unbearable as you are, didn't I, at which you felt hurt? Well, I take it back—there are others."

Ladies, you cannot make fair skin, rosy cheeks and sparkling eyes with all the cosmetics of France, or beautifiers of the world, while in poor health, and nothing will give you such good health, strength and beauty as Hop Bitters freely, there would be much less sickness and misery in the world; and people are fast finding this out, whole families keeping well at a trifling cost by its use. We advise all to try it.—U. & A. Rochester, N. Y.

Another New Science.

Says a New York correspondent: Psychometry is the impressive name of a so-called science "from which no Lodge of this city organized last year a mortal man can conceal his thoughts if society which they styled 'The Mortal he will dare to write what he pretends Twelve of York.' Its members are: archis convictions on paper. The moment Frank J. Expensive Drugs.

There are two mad men in Milwankee. One is a bald-headad man and the other is a druggist. The bald man told a doctor that his hair was fulling out, and asked him if he didn't know of something that would stop it. The doctor said he would fix him, so he wrote a prescription, which was as follows: Chloride of sodium - - 1 oz.

Aqua pura - - - - 8 oz. Shake well and rub on the scalp every morn-The bald man went to a druggist and

had the prescription put up, paying a dollar and seventeen eents for it. asked the druggist if it wasn't a little high, but felt ashamed when the druggist asked him if he knew how much aqua pura cost n gallou. He said he didn't, but supposed it come high. The druggist told 'mm aqua pura was one of the most penetrating drags in the store, and as for chloride of sodium, there was nothing like it, and the war in Pern had sent it up kiting. He said if the trouble in Chili kept on there was no knowing how high it would be. The bald man used the medicine, and felt as though it In the Philadelphia Times of recent was doing him good. His wife noticed date, we notice an item referring to the little new hairs coming out, and he felt mirneulously quack cure of a promine good, so when the stuff was gone he druggist of that city, Mr. J. M. Higgins, took the bottle to the store and had time was another chap, and when the bald-headed man threw down a dollar at night, and next morning was well and the drugger said, 'O, never mind. We the drugger said, "Why, it is only salt and water anyway. The salt is only two cents a pound, and the water is pretty cheap this year." The bald man gave one gasp, and said, "Well, by the great lmld-headed Elijah, I paid a dollar for tilling that bottle before, and I want my money back. It is a babl-headed swin-I thought that Pernvian story didn't look plansible." The druggist gave the man a box of cigars to keep still about it, but he won't speak to the other drugger who charged him a dollar.

-Peck's Sun.

Self-luminous photographs are at the present moment, according to the Photographic News, attracting-much-publi attention in Vienna. When these are examined by daylight they look like. ordinary paper photographs; but in the dark they are beautifully phosphorescent in the high lights, have a more or less feeble glow in the half-tones, and in the deep shadows possess no luminosity. preparation of these self-luminous photographs is very simple. A silver print on albumen paper, or colletype, is rendered transparent by brushing over it a mixture of equal volumes of castor oil and oil of turpentine. The superflu-ous oil is removed by means of cottonwood or a linen rag, and the phosphorescent paint is then put on. The paper thus prepared is then dried, and after-ward mounted with its reverse side on cardboard. So soon as it has been exposed to the daylight, and the light penetrates through the transparent or semitransparents parts, the phosphorescence of the luminous paint underneath is ex-cited, and in the dark the image is seen. with all its gradations; brilliant pictures, and moonlight landscapes, give espec-ially good results. These self-luminous

CONSUMPTION CAN BE CURED!

How Voltaire Cured the Decay of His

Stomach. In the "Memoirs of Count Segur" there is the following anecdote: "My

mother, the Countess de Segur, being asked by Voltaire respecting her health, told him that the most painful feeling the had arese from the decay in her stomach and the difficulty of finding any kind of aliment that it could bear. Voltaire, by way of consolation, assured her that he was once for nearly a year in the same state, and believed to be incurable, but that nevertheless a very simple remedy had restored him. It consisted in taking no other nourishment than yolks of eggs beated up with the flour of potatoes and water." Though this circumstance concerned so extraordinary a person as Voltaire, it is astonishing how little it is known and how rarely the remedy has been practiced. Its licacy, however, in eases of debility, can not be questioned; and the followingis the mode of preparing this valu ble article of food as recommended by Sir John Sinclair: Beat up an egg in a borl and then add six tablespoonfuls of cold water, mixing the whole well getter; then add two tublespoonfuls faria of putatoes; let it be mixed thoroughly with the liquid in the bowl. The pour in as much boiling water as willconvert the whole into a jelly, and mint well. It may be taken alone or will the addition of a little milk in case of stomachic debility or consumptive listders. The dish is light and easily

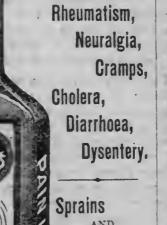

way, but a bushel of turnips will furtime, and one evening were reading the paper together. "Look, love," he exclaimed, "only \$15 for a suit of clothes!" "I it a wedding snit?" sheasked, lookand pour on hot water a moment; then puswered; "it is a business suit." "Well. Yark Commercial.
